To help accommodate the flexibility of summer schedules, students will be able to work at their own pace as long as they finish within the three-week period and submit certain time-sensitive assignments on schedule. Due dates for all coursework will be posted on Canvas on the first day of class.

***Textbook Information**
The ISU instructor will contact each student with textbook information, by email, upon enrollment into the class.

In order to complete these online courses, you should be familiar with accessing information via the Internet, uploading and downloading files, and participating in threaded discussions. During the courses, you will be creating documents in Word and PowerPoint in addition to using Canvas to access course materials. You must be familiar with the software in order to complete the assignments. The computer you use should have a broadband connection rather than a dial-up modem.

*These classes are approved and required by ISBE for teachers to be qualified as an educator-coordinator for a workplace experience course (<https://www.isbe.net/Documents/Work-Based-Learning-Manual.pdf> page 26). The classes are hands-on and will enable you to create materials for use in a workplace experience course.
